Forecast for Friday 09 Jul 2021

Weather: Largely dry through the early hours, although misty beneath any low cloud. The low cloud will then lift and break by late morning with plenty of sunny spells for the afternoon. A few light showers are possible though ahead of thickening cloud over western areas later in the evening.

Chance of cloud free mountain/hill tops above 600m: 60%, improving to 90% by early afternoon, falling to 60% again by late evening.

Visibility: Low cloud will affect west and southwestern areas through the early hours and first thing on Friday morning, covering some slopes around 400m. Any low cloud will lift during Friday morning with generally good visibilities prevailing, with only patchy cloud occasionally covering slopes above 800m. Some deteriorations are likely in showers, when views of nearby hills will appear somewhat misty, and with cloud perhaps briefly lowering closer to 600m. Patchy low cloud returning to some western areas by late evening, with cloud bases around 400m.

Forecast for Saturday 10 Jul 2021

Weather: Any patchy rain and low cloud during the early hours will clear to leave sunny spells and a few showers. The low risk that some of the showers could be heavy and perhaps thundery in the afternoon.

Maximum wind: Southwesterly 5-10mph gusting 10-15mph.

Chance of cloud free mountain/hill tops above 600m: 40% during the early hours, becoming 90% by the afternoon.

Visibility: Moderate to poor visibilities are expect during the early hours as cloud bases remain low at around 600m, but perhaps down to 300-400m across some southwestern facing upslopes. Visibilities improve by lunchtime as the cloud lifts and breaks with cloud bases remaining largely above the summits thereafter.

Temperature: **Valleys:** Plus 13 Celsius, rising to plus 21 Celsius.
At 600m: Plus 9 Celsius, rising to plus 13 Celsius.
Freezing level: Above the summits.
